

The adjustable screw for fast and infinitely adjustable installation of timber constructions

Stand-off installations

Stand-off installations

BUILDING MATERIALS

- Wood and wooden materials or wooden panels

ADVANTAGES

- The special operating principle of the adjustable screw JUSS allows for infinite adjustment. This saves on the use of wedges and blocks when fixing the fixture.
- The self-drilling thread of the adjustable screw JUSS cuts directly into the wood. As such, no pre-drilling is required.

APPLICATIONS

- Substructures made of wooden battens of 20-25 mm thickness.

FUNCTIONING

- The JUSS is suitable for push-through installation.
- Once the screw has been screwed in, the parallel thread below the screw head causes the fixture to initially pull against the substrate. The fixture distance can then be infinitely adjusted by modifying the rotation direction.

TECHNICAL DATA

Self-drilling adjustable screw **JUSS** for \odot -bit T25

Item	Art.-No.	Effect. anchorage depth h_{ef} [mm]	Max. distance a [mm]	Screw $d_s \times l_s$ [mm]	Max. timber thickness d_a [mm]	Drive	Sales unit [pcs]
